**Abstract.** The aim of the research is to know impact change in English pronunciation by Korean idols when interviews. To know many sounds and spelling Korean idols change, The variable in this research is Korean idol. The indicator in this research is English pronunciation spoken by Korean idols. From observation, it will be obtained about a problem, Collecting English word that change pronunciation by Korean idols. By capturing videos watched on YouTube and at what minute there are English word that change pronunciation by Korean idols. The influence of changes in pronunciation by Korean idols is due to the position of the speech organs they tend to pronounce a word in a simpler way by changing the sound through the position of the speech organs. Most Korean vowels are pure vowels, using only one articulate position, and without the lilt that is so common in English. The majority of Korean vowels are pure vowels, which use only one position of the articulaor and do not have the glide that is so common in English. Other vowel sounds that transcend certain pronunciation positions are diphthongs. Korean vocal phonemes offer long and short versions as well as long-only complex phonemic features.
